Excellent heat conductivity.

The transmittance is up to 92%.

Use toughened glass, high temperature resistance.

The surface of the radiator is treated with anodic oxidation.

Simple installation, easy to remove, wide range of application.

Efficient heat sink: use of die-casting cold forging technology, large cooling area, good cooling effect.

Shell with high-pressure die-casting aluminum, solid and stable structure, strong impact resistance, strong pit shock, shell surface paint treatment, anti-oxidation, anti-salt spray, anti-corrosion, anti-rust.

Use High luminous SMD3030 light source, with higher luminous efficiency, can get about 100-155lm/w, after we test, less light failure, energy saving and better illumination effect, high stability, longer life-span.
