## Product Description

### Product Overview

The Solar Street Light is our Patented Products, Designed to provide user with the high-quality solar photovoltaic street lamp, has passed ce, ul, etc certifications. " Wire free, easy to install" "high charging efficiency", " Strong endurance", and " outstanding light efficiency" Feature are the main Advantages of the split solar light, large capacity Lithium battery is built into the lamp body, which can absorb solar energy and convert it into electric energy by solar panel It is stored in the battery and then supplied to the solar lamp, products are widely used in highway, courtyard, and other areas.

## Sell Points

- 1. Convenient installation** All-in-one solar light means the solar panel is embedded in the lamp body. This design eliminates complex installation accessories such as brackets. It will increase installation efficiency in several times.
- 2. Efficient quick charging scheme** This product adopts the latest quick charging scheme, and charging efficiency can be up to 50% higher than similar products. For example, similar products use 6V/12W solar panel and the peak charging current is 2A; our product uses 4V/12W solar panel and the peak charging current is 3A. By comparison, the charging efficiency of our products has been improved by 50%.
- 3. Multiple functional models** Our product has three brightness, including radar mode for all night, constant lighting mode for all night, and switch to radar mode after constant light mode.
- 4. Smart power management system, extra-long battery life** We are committed to meet the needs of customers "365 days, daily brightness", our company has developed a smart power management system in cooperation with the University of Electronic Science and Technology to make sure our product not only has higher charging efficiency, but also can actively identify the amount of charging per day, so as to independently adjust the capacity to achieve a better rainy day efficiency.
