Product Description

Product Description:

The Integrated Solar Street Light is a revolutionary lighting system that utilizes renewable solar energy to provide illumination without the need for electrical power. This innovative system is designed to be a cost-effective solution for areas needing long-term outdoor lighting. With an integrated design, the solar street light is easy to install and requires minimal maintenance. It is equipped with a powerful solar panel, which can capture and store energy from the sun, and a high-efficiency LED light source with a luminous flux of 150-160LM/W and a color temperature of 6000K. The solar street light also features an integrated battery with a capacity of 12.8V/20AH to ensure reliable operation even in poor weather conditions. The system is designed to last for up to 3 years and is backed by a comprehensive warranty for added peace of mind.
