Product Description

Our Product

Product Description:

Our Solar LED Street Light is a highly efficient and automatic lighting system powered by solar energy that combines state of the art LEDs with a reliable and intelligent solar street lighting controller. With an IP65 waterproof rating and 50,000 hours of lifespan, it is perfect for

applications such as roads, streets, yards, parks and gardens. The lighting mode consists of remote control, light control and radar sensor, making it ideal for outdoor illumination. Moreover, the CRI of this solar system is more than 80, offering a high quality lighting experience.

This solar street lighting system is designed for all outdoor lighting needs, and it is an ideal choice for those looking for a sustainable and cost-effective solution. Using the latest LED technology, it can provide reliable and automatic illumination for various applications, such as pedestrian walkways, streets, plazas, parks and other public areas. Its automatic operation allows it to switch on and off at dusk and dawn, and its advanced sensors can detect the presence of people, vehicles and other objects, and adjust the light level accordingly. Our automatic solar street lighting system is a reliable and efficient alternative to traditional lighting solutions. It is easy to install and maintain, and offers excellent energy savings and environmental benefits. With its long life span and reliable performance, it is the perfect choice for those looking for a sustainable and cost-effective solution.
