

Mono Solar Panel Automated Solar LED Street Light For ABS Remote Control

Our Product Introduction

for more products please visit us on solarledstreet-light.com

Basic Information

- Place of Origin: Guangdong China
- Brand Name: Yahua Solar Street lighting
- Certification: CE IP65 ROHS ISO
- Packaging Details: Anti-collision and shatterproof packaging
- Delivery Time: 5-8 days
- Payment Terms: T/T, Western Union, MoneyGram
- Supply Ability: 500 pcs/month

Product Specification

- Luminous Flux: 150lm/w
- Warranty: 5 Years
- Working Temperature: -40°C-60°C
- Lighting Mode: Remote Control+Light Control+Radar Sensor
- Application: Road , Street , Yard, Park, Garden Etc
- Life Span: 50,000hrs+
- Battery: Lithium Iron Phosphate Battery
- IP Rating: IP65 Waterproof
- Highlight: **ABS Housing Solar LED Street Light, Waterproof Automated Solar LED Street Lamp, Energy Saving LED Street Light 400W**

Product Description

Overview

General spec	
Solar panel	A-class high efficient
Battery	Lithium Battery
Material	ABS
light color	cold white or other colors required
Application	Road, street,yard, garden,villa, outdoor
Function	light control motion sensor remote control

Please send us a message for more details

Highlighted LED Chip

The light uses a high level LED chip which is energy-saving and more steady. It has lower light decay, which is lower than 2% glowing every 3000 hours. This kind of LED chip dissipates less heat when glows so that the light can be more durable and energy-saving. In addition, the light color is clearer with a higher color rendering index. A good LED chip is very important. More led doesn't necessarily mean more bright. Choose good led.

ABS Housing

The light uses high-quality ABS material, a kind of material specially for outdoor light, which is anti-corrosion, impact resistant, moisture-proof, and waterproof, so it makes a long life of the

light. Also, the housing and solar panel are connected with stainless screws, and you can open the light simply.

Intelligent Radar sensor

This product is an intelligent motion sensor with a sensor distance of 8-10 meters. The light becomes 100% bright when people are close, and automatically turns to half brightness when there are no people around, which is more environmentally friendly and energy saving. We can also do 100% brightness all the time if you don't like this mode.

High-Efficient Solar Panel

The solar panel is made of A-class polycrystalline silicon, which works more efficiently in weak light. The outer layer of the solar glass laminate is made of highly transparent tempered glass, with transmittance as high as 93%. The solar panel is well sealed, which can prevent all kinds of bad weather like rain, hail, and snow.

High capacity Lithium battery

The in-built lithium battery is large capacity and sufficient to ensure the light illuminates overnight. It's also more stable and safe for use with short circuit protection, input protection, and over-voltage protection. And the use of low-discharge technology greatly reduces the natural loss of electricity.
